MINTON, TREHARNE
& DAVIES GROUP

A BRIGHT FUTURE

NDT TRAINEE PROGRAMME

WE ARE LOOKING FOR DRIVEN INDIVIDUALS
WITH A GENUINE INTEREST IN ENGINEERING TO
JOIN OUR EVER GROWING NON-DESTRUCTIVE
TESTING TRAINEE PROGRAMME.

WHO ARE WE?

Minton Treharne & Davies Limited
provide scientific consultancy, surveying
and testing services to a worldwide
client base from our offices in the UK,
Europe, USA, Asia and Australia.

We are world leaders in Non-Destructive
Testing (NDT) and are happy to
count Rolls Royce, Airbus and BAE
Systems within our client portfolio.

WHAT ARE WE OFFERING?

We are offering the right candidates, the opportunity to become part of our very successful trainee programme. As part of our programme you will receive formal training courses at recognised training establishments, exams and certification, alongside on the job training.

The trainee programme is divided in to 5 main areas of NDT; you will gain experience in all 5 areas:

- Ultrasonic testing
- Magnetic particle inspection
- Eddy current testing
- Liquid penetrant inspection
- Radiographic testing

After successful completion of the programme you will gain full time employment as an NDT Technician at MTD.

WHAT'S IN IT FOR YOU?

- Full time employment (37.5 hrs per week)
- Starting salary between £12,000-£14,000
- 25 days annual leave, plus 8 bank holidays
- Pension Scheme
- Employee Assistance Programme

MEET JOSH

Josh joined the company at 19 years old and successfully completed our trainee programme. Josh has now been with the company for 12 years and is our Aerospace and Marine NDT Supervisor.

“

I always had an interest in how things were made and how things worked ever since school. Once leaving school and studying aeronautical engineering and completing a traineeship with British Airways, I had come across an interest in NDT. I had then heard about Minton Treharne and Davies offering apprenticeships in NDT and I carried out some research about the company, applied and got offered the position.

What do you enjoy most about the role?

The variation in the job and the different parts of the world you get to see. Traveling to some countries where I'd never of thought I'd get to visit and seeing them while getting paid is always good!

What do you think about the company and your team?

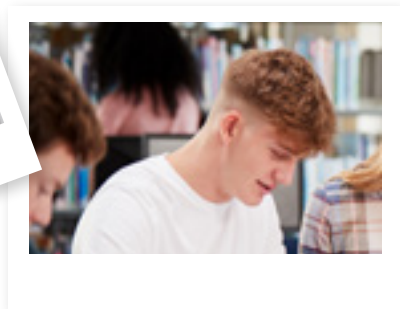

The team are great, everyone gets along and it's a relaxed environment to work in but also professional. It's a great place to work, everybody is helpful and understanding if you ever have any issues or questions, everyone is very approachable.

What advice would you give to somebody applying for this role?

If you're looking for a challenging career with plenty of job prospects and opportunities to travel, a career in NDT could be for you!

WHO ARE WE LOOKING FOR?

We are looking for candidates with great communication skills and a hands-on approach. Ideally you will have completed your A Levels, have good IT skills and have GCSE's in Maths, English and Science. Applications from students with GCSE's only are welcome.

WANT TO APPLY?

If you're interested in the trainee programme, please send a CV and cover letter explaining:

- Why you're right for the position
- Why you would like to join MTD
- What you could bring to the company
- Where you see yourself in 5 yrs time

Once complete, please send applications to: bethan.jones@minton.co.uk.

Should you have any questions don't hesitate to get in touch.

We look forward to hearing from you and the very best of luck!

MEET MATT

Matt joined our trainee programme nearly 11 years ago and has worked his way up to a NDT Supervisor of Radiography.

“

I started in college doing a NVQ in mechanical engineering as I always wanted a hands on job. I knew I didn't want to go to university after college and wanted to earn my own money, I've never looked back. I didn't know what non-destructive testing (NDT) was prior to starting the trainee programme here but when I looked in to it I knew it was a niche market and could earn a lot more money in this sector.

What do you enjoy most about the role?

Having worked here nearly 11 years, I can say every day is different and some days its very challenging which I enjoy.

What do you think about the company and your team?

The company is family run which I think is great, they have given me opportunities to develop throughout my career and will continue to do so. The company also serves a lot of different industries so work is constant which means I have job security. We are a close knit team, who work well together but still have fun which is vital in this kind of role.

What advice would you give to somebody applying for this role?

You need to have a good work ethic and willingness to learn and develop. You will need to be happy working as part of a team and be flexible with working away from home
